SUMMARY

Aspiring Data Analyst and undergraduate student in Statistics and Data Science at Universitas Negeri Semarang, with a strong interest in data analysis, machine learning, and technology. Skilled in analytical thinking, problem-solving, teamwork, and continuous technical learning through academic projects and active involvement in student organizations. Experienced in working on collaborative projects that strengthen communication, adaptability, and project coordination skills. Currently seeking internship opportunities to apply analytical and technical abilities, gain professional experience, and contribute to data-driven decision-making in a dynamic work environment.

EXPERIENCE

Junior Staff of Environmental Division, BEM FMIPA

BEM FMIPA Universitas Negeri Semarang, Semarang, Central Java, Indonesia

Jan 2025 – Des 2025

- Assisted in planning and implementing environmental awareness programs and activities.
- Supported campaigns, clean-up events, and sustainability initiatives at the faculty level.
- Coordinated with team members to help ensure smooth execution of organizational programs.

Member of Robotics Division, UKM RIPTEK UNNES

UKM RIPTEK Universitas Negeri Semarang, Semarang, Central Java, Indonesia

Jan 2025 – Des 2025

- Participated in robotics division activities, projects, and technical discussions.
- Assisted in the development, assembly, and testing of robotics systems.
- Collaborated with team members in problem-solving and project implementation.

Member of VTOL Division, SUVIFOR Robotika UNNES

SUVIFOR Robotika Universitas Negeri Semarang, Semarang, Central Java, Indonesia

Jan 2026 - Present

- Participated in VTOL (Vertical Take-Off and Landing) drone development activities and projects.
- Assisted in the design, assembly, and testing of VTOL drone systems.
- Collaborated with the software team to support integration, troubleshooting, and project implementation.

PROJECTS

EcoSentra - Monitoring Website for Tree Species Classification

Gemastik 2025 Project

GitHub: [EcoSentra](#)

- Contributed to the development of a monitoring website focused on tree species classification.
- Supported project coordination and implementation in an academic and collaborative setting.

Health Insurance Claim Prediction Pipeline — DSC MCF ITB 2026

Data Science Competition Project

GitHub: [Data Science Competition](#)

- Developed a health insurance claim prediction pipeline for the Data Science Competition — Mathematical Challenge Festival (MCF) ITB 2026.
- Built predictive models for claim frequency, claim severity, and total claim using structured preprocessing, feature engineering, and forecasting techniques.
- Combined Exponential Smoothing, LightGBM, and Optuna to improve prediction performance and tune model parameters.
- Applied recursive forecasting and generated final competition outputs in submission-ready and reusable model artifact formats.

Acute Lymphoblastic Leukemia (ALL) Image Classification

Deep Learning Research Project

GitHub: [Acute-Lymphoblastic-Leukemia-ALL-Image-Classification](#)

- Built a deep learning pipeline to classify peripheral blood smear images into four ALL-related classes: Benign, Early, Pre, and Pro.
- Compared AlexNet, ResNet18, ViT-Base, and Swin-Tiny to evaluate CNN and Transformer performance on medical image classification.
- Implemented stain normalization, data augmentation, class imbalance strategies, and hyperparameter tuning to improve validation performance.
- Used stratified group holdout splitting to avoid patient-level data leakage and produce more reliable model evaluation.

EDUCATION

Bachelor's Degree in Statistics and Data Science

Aug 2024 - Aug 2028 (Expected)

Universitas Negeri Semarang (UNNES), Faculty of Mathematics and Natural Sciences, Semarang, Central Java, Indonesia

- Undergraduate student in Statistics and Data Science.
- Awarded 2nd Runner-Up in the UNITY UNY 2025 Scientific Writing Competition.
- Awarded 1st Runner-Up in the UNITY UNY 2026 Data Mining Competition.

SKILLS

Technical: Python, R, SQL, Excel, pandas, NumPy, scikit-learn, Matplotlib

Analytical: Data Analysis, Statistical Analysis, Machine Learning Fundamentals, Data Visualization, Research Writing

Professional: Problem Solving, Teamwork, Project Coordination, Communication, Cross-functional Collaboration

AWARDS

2nd Runner-Up, Scientific Writing Competition, UNITY UNY 2025

1st Runner-Up, Data Mining, UNITY UNY 2026
